

quick reference

Controls, bindings, behaviors, and Dance pages on one page.

regular controls

Turn Main	Menu navigation · navigate menu / edit value
Click Main	Menu selection · select, edit, confirm
Back	Exit location · exit edit, overlay, or menu level
Play	Transport · play or pause
Shift + Play	Stop · external sync arms resync
Shift + Back	Clear layer · re-initialize active layer
Shift + Fn + Main	Context help · hold modifiers, click row

navigation + bindings

Fn + left column	Navigate to Part 1–8 · bottom row = part 1
Hold Fn	Preview · gray available, green current
Fn + right column	Navigate Dance · exits if already active
Fn + Aux click	Bind focused value/action · value to turn, action to click

Auto-map maps *Aux 1–3* to important values/actions in the current menu area. It temporarily overrides manual bindings.

1-Cutoff

Aux 1 turn

1!Assign

Aux 1 click

special grid modes

Sample assign	Shift + cell maps row; Shift + Fn + cell maps column
Probability map	Trigger chance: never, low, high, always
Dance Mix	Grid becomes a mixer for each part's volume
Dance Pan	Grid moves around parts' stereo positions
Dance FX	Press mapped cells to trigger live effects
Trigger Gate	Block, allow, or use custom probability per part
Transpose	Temporarily transpose synth and MIDI parts
XY	Mappable two-axis surface for live-manipulating parameters

behaviors

none	Inactive part	keys	Finger-drumming
sequencer	Manual rhythm anchor	looper	Recorded grid gestures
life	Birth/survival/death cells	brain	Pulses and trails
ant	Walking grid agent	bounce	Moving collisions
shapes	Geometric regions	raindrops	Drops and ripples
dla	Branching growth		

triggers

activate	Cell turns on
stable	Cell stays on
deactivate	Cell turns off
scanned	Scanner finds active cell
scanned empty	Scanner visits inactive cell

patch orientation

- Route **sequencer** or **looper** to **sampler** for a rhythm loop.
- Add **life**, **raindrops**, **bounce**, or **dla** to a **synth**.
- Use probability on sequencer cells so patterns feel alive.
- Bind aux encoders to parameters or actions you keep reaching for.

Factory preset hint: **life** on Part 1, **sequencer** rhythm on Part 2.

If the grid behaves unexpectedly, check the OLED. You are probably in an overlay or Dance page. Use *Back* or *Fn* to leave.

cell state to sound

From behavior state and direct input to MIDI, internal audio, routing, and optional live FX.
